

ACTIVITY 18: "Subtraction (roll two advanced black dice and one basic red die)"

Purpose of the activity:

- Student will be able to add two numbers with a sum up to 26 and then subtract a one-digit number from that sum.

Materials needed:

- Two advanced black dice and one basic red die.

How to play:

- Three dice are rolled and the student adds the two black dice together and then subtracts the red die from that sum. Teacher could explain to the student that if the number showing on the red die is the same as the number showing on either black die the answer will be the number on the other black die.
- This activity is the exact same as Activity 18 except that none of the dice are "set".

Possible Next Steps/ When to Move On To Next Activity:

- When the teacher is satisfied that the student can do this problem accurately and without hesitation it is time to advance to doing Challenge 3.
